Rural Cellular Corporation E911 Implementation Report May 1,2007

Summary

Rural Cellular Corporation (“Rural Cellular”) operates wireless networks in rural communities in 14 states covering about 6 million people. RCC’s service area encompasses 38 rural service areas, 3 metropolitan statistical areas and a few partitioned major and basic trading areas. Rural Cellular has deployed GSM and CDMA overlays in several markets, and continues to operate predominately its underlying TDMA/analog technology.

Phase I

Rural Cellular has had success in the deployment of Phase I location capability services. For details on these deployments, please refer to the spreadsheet set forth in the Appendix to this report.

Phase II

Rural Cellular has also been delivering Phase II services to public safety answering points, Rural Cellular continues to have concerns about the performance of network-based solutions in rural markets. Rural Cellular has elected a handset-based solution for all of its CDMA markets.

In addition to the network-based solution provided by Grayson Wireless, Rural Cellular has deployed in certain TDMA and GSM networks an alternative network-based solution provided by Polaris Wireless.
